

INFORMATION DEPLOYED.

SOLUTIONS ADVANCED.

MISSIONS ACCOMPLISHED.

CACI
EVER VIGILANT

CACI delivers innovative, high-end information solutions and services that support the critical missions of our defense, intelligence, and federal civilian customers.

Business Systems

Transforming How Government Does Business

We apply technological expertise, Agile methodologies, and deep customer understanding to enable enterprise system

evolution, to keep commerce flowing, and to increase business productivity. We have developed and implemented solutions and shared services that enable the government to conduct business more efficiently.

Intelligence Services

Decisive Expertise for Evolving Missions

We support global intelligence operations by leveraging traditional and evolving sources of information to drive awareness,

counter national security threats, forecast events, and improve decision support. We enable the IC, DoD, and federal agencies to analyze massive volumes of data in order to deliver desired mission effects and outcomes.

Command and Control

Enabling Information Superiority on the Battlefield

We provide seamless command and control capabilities that drive network-centric operations, achieve shared awareness, and understand asymmetric defense environments. For the Army, we develop and support C2 systems that improve commanders' situational awareness, and integrate these systems into various platforms to enhance mission coordination and direction.

Intelligence Systems and Support

Propelling Awareness to the Cutting Edge

Our solutions advance near real-time intelligence, drive analysis, and deliver rapid systems integration to gain operational

advantage while meeting the rising tempo of missions. We've built the systems used to process nearly all the foreign instrumentation signals data collected by the Intelligence Community today.

Communications

Accelerating the Exchange of Information in a Global Space

We develop, integrate, and sustain rapidly deployable communications solutions for soldier systems, mobile plat-

forms, fixed facilities, and the enterprise to advance connectivity and facilitate collaborative mission planning. We provide our armed forces, the IC, and DHS with secure, unified communications systems and wireless connectivity where it is most needed.

Investigation and Litigation Support

Supporting Personnel Security Investigations and Case Wins

We provide investigation and litigation support from start to finish, an accredited computer and audio/video forensics lab,

secure Software as a Service cloud hosting, and quality, cost-efficient personnel security investigations. We have assisted the U.S. government in investigating and litigating thousands of cases, saving taxpayers billions of dollars.

Cyber Security

Precision Technologies for Evolving Threats

CACI combines cyber and digital signals processing techniques to support cyber operations for the DoD and IC. We assess

platforms and analyze vulnerabilities, develop tools and capabilities, build cyber operations infrastructure, and protect critical networks. For the Air Force, Navy, and Army, we have analyzed vulnerabilities across the cyber and RF spectrums for multiple platforms to ensure cyber resiliency.

Enterprise IT

Amplifying Efficiency With Next-Generation Technology

We deliver cloud-powered technology and infrastructure solutions that are ahead of the curve, built-in

security to ensure information integrity, and end-to-end managed services that optimize efficiency. Several of the largest Intelligence, DoD, and civilian agencies rely on CACI to design, implement, sustain, and manage their enterprise IT solutions.

Health

Modernizing Health Systems

We support the Department of Defense and civilian health agency missions by modernizing their IT systems supporting the delivery of healthcare

and benefits, public health surveillance, and emergency response. For DoD, the Veterans Administration, and Health & Human Services, we stand ready to integrate health systems to facilitate data sharing, improve cost efficiencies, mitigate health threats, and enable response.

Logistics and Material Readiness

Advancing Readiness, Ensuring Combat Sustainability

From warehouse to forward operating positions, we deliver product lifecycle management, supply chain

solutions, improved logistics operations, workforce development, and training. Our readiness tools enable Navy customers to determine range and depth of spare parts in support of maritime and aviation weapons systems, saving the Navy over \$2 billion.

Space Operations and Resiliency

Predicting Outcomes.

Protecting Space.

We deliver the technology and support to launch, operate, and exploit systems in the space domain.

Our predictive solutions allow decision-makers more options for maneuvers and response. We assist customers to plan complex launch missions, modernize and sustain ground operations, protect the space enterprise against attack, and identify and analyze objects and activity in space.

Surveillance and Reconnaissance

Enhancing Situational Awareness for a Decisive Tactical Edge

We develop and integrate state-of-the-art sensors that enhance situational awareness, mobility,

interoperability, and survivability on air, ground, and sea-based platforms. For DoD, we support the development of technologies that improve the ability of our nation's soldiers, sailors, airmen, and marines to detect and identify targets, as well as perform missions at night and in limited visibility conditions.

We bring the **right people**, the **right expertise**, and the **right technology** to solve our customers' toughest challenges.

At CACI, America's Missions Are Our Missions

For more than 56 years, we have delivered innovation, expertise, and excellence in support of our customers' vital national missions to defeat global terrorism, secure the homeland, and improve government services. Through our long-standing customer relationships across the federal marketplace, we have become a trusted provider of high-value solutions and services for our nation's highest priorities.

CACI's approximately 19,800 employees worldwide – some 65 percent of whom hold security clearances – stand ready to provide the exceptional service, dedication, and innovation our customers require. Our leading-edge solutions and services counter national security threats; keep America's armed forces equipped and mission-ready; secure vital data and IT infrastructures; support and protect space operations; and help customers modernize and transform how the government does business.

Excellence Built on Our Distinctive Culture

The foundation of our success is our vibrant, company-wide culture of good character, ethics, and integrity. We are *ever vigilant* and always strive to *do the right thing* for our customers, our partners, our shareholders, and each other. Our culture unifies us as a company and motivates us to continually improve the solutions and services we deliver to our customers. Hiring talented people, recognizing and rewarding hard work and innovation, and delivering our best effort every time: these remain our focus, our strategy, and the keys to our success.

Corporate Governance

CACI recognizes the importance of good corporate governance as a means of addressing the interests of our shareholders, employees, customers, and community. Our long-standing philosophy has been to sustain the highest possible business ethics in the pursuit and performance of our business. Fundamental to this commitment is our corporate policy statement, which clearly delineates our philosophy, responsibilities, and authorities for assuring compliance. We believe in acting ethically, being ever vigilant, doing top-notch work, being responsive to clients, and "QCS, BV" – Quality Client Service, Best Value.
