

**Strategic Solutions Guided by Core Values**

As a national service enterprise, CACI puts ethics, honesty, and business integrity in the forefront of all we do. Those common values are as inherent in our company's DNA as mission focus is to warfighters in theater. And as much as superior quality and service are the overarching objectives in what we do, dedication to country and those who serve are why we do it. With national missions and human treasure at stake, anything less is unacceptable.

Ethos  
Principles  
Culture

**Industry Recognition**

- Contractor of the Year (greater than \$300 million) – *Greater Washington Government Contractor Awards*
- Largest software developer in national capital area- *Washington Business Journal*
- 16th Largest Federal Prime IT Contractor – *Washington Technology*
- 22nd in Top 100 Companies and 3rd Most Valuable in Aerospace and Defense – *Washington Post*
- Most Valuable Employer for Military – *CivilianJobs.com*
- Top 50 Military-Friendly Employers – *G.I. Jobs*

**CACI International Inc** provides professional services and IT solutions needed to prevail in today's defense, intelligence, homeland security, and federal civilian government arenas. We help our federal clients provide for national security, improve communications and collaboration, secure the integrity of information systems and networks, enhance data collection and analysis, and increase efficiency and mission effectiveness. CACI is a member of the Fortune 1000 Largest Companies and the Russell 2000 index.

**Certifications**

- CMMI®, an industry model for excellence in software development and systems engineering
- ISO® 9000 series, a globally accepted quality management standard
- ISO® 20000 offers customers a benchmark for assessing service levels, measuring performance, and implementing continuous improvement
- Certified Information Systems Security Professional (CISSP)
- DoD 8570 Series
- Project Management Institute Global Registered Education Provider (G.R.E.P.)
- ONR BMP Award for Excellence RCM Program

MEETING CHALLENGES  
FROM CONCEPT TO COMBAT

Innovation  
Value  
Integrity

Innovation may be the most powerful war-fighting tool in America's arsenal. Advances in technology, and its application, deliver a decisive edge on the battlefield. Our people are thought leaders working at the forefront of cyber, networks, information science, engineering, and logistics.

**CACI Functional Core Competencies**

- Enterprise IT and Network Services
- Data, Information and Knowledge Management Services
- Business System Solutions
- Logistics and Material Readiness
- C4ISR Integration Services
- Cyber Solutions
- Integrated Security and Intelligence Solutions
- Program Management and SETA Support Services

# Deploying Technology to Help the Warfighter

## Achieve Agility and Force Protection

### Experience and Expertise

CACI's broad experience and expertise combine the creative application of advanced technologies, comprehensive system-of-systems engineering integration, rapid prototyping, and full lifecycle support. All underpinned by standards, methodologies, and a solid program management discipline.

### System-of-Systems Integration

Our strength in system-oriented architectures supports the system-of-systems integration of sensors, intelligence, battle command, and networks in a network-enabled command and control environment.

### Fabrication and Rapid Prototyping Capabilities

CACI modifies and integrates a wide range of command, control, communications, and sensor equipment into shelters and mobile configurations, develops training, and provides technical, logistical, and operational support in-theater and on-the-move.

### Tailored End-to-End Enterprise IT

CACI supports customers' critical networked missions with IT services that enable fixed site and mobile communications. We build, deploy, and manage satellite communications, including the family of Trojan systems for the U.S. Army.

### Assured Cyber Protection

Our cyber solutions functional core competency supports the full lifecycle of preparing for, protecting against, detecting, and aggressively targeting the full range of cyber threats.

**Combat-tested and airborne stand-off reconnaissance capabilities**

**Unattended and robotics technologies countering IED threats**

**Secure and reliable 3G/4G wireless intelligence communications**

**Airborne persistent ISR solutions**

**Secure SATCOM solutions**

## C4ISR and Engineering

- System-of-systems engineering and integration to end-to-end lifecycle support to deliver net-centric C4ISR solutions
- Solutions and services using multi-domain expertise to integrate intelligence, sensors, communications battle command and networked effects
- Survivable and integrated communications systems
- COTS equipment integrated into rugged, transportable designs

## CRaDL

The 60,000-square-foot CACI Research and Development Labs (CRaDL) facility is a center of excellence for defense technology to support the warfighter and homeland security. Located at Aberdeen Proving Ground, Md, CRaDL serves as an R&D incubator for CACI's C4ISR capabilities as well as existing and developing resources. Created with a vision to accommodate all those whom we work with and support, CRaDL is open to clients and partners alike as a place to refine and develop their technologies.

### From Desert Tan to Business Blue

As you transition your military career to a civilian career, we invite you to consider bringing the knowledge, skills, and abilities you have gained in uniform to one of the most successful, military-friendly companies in the U.S. today – CACI.
