

# Theater Medical Operations and Medical Logistics

## HEALTHCARE SOLUTIONS for Our Military Supporting Global Operations

CACI provides end-to-end healthcare solutions and services for our nation's military deployed in theaters of operations globally. We integrate, test, train, deploy, and sustain electronic medical records and health-related software on U.S. deployable military systems to enhance interoperability and deliver continuity of care for U.S. military personnel abroad. CACI provides emergency preparedness, logistics, and medical contingency support for the Department of Defense and rapidly deploys assets in support of wartime efforts, humanitarian relief, and other contingency operations worldwide.

A *Fortune* World's Most Admired Company

EXPERTISE AND TECHNOLOGY FOR NATIONAL SECURITY

**CACI**  
EVER VIGILANT

## Highlights:

- Accurate, efficient, and high-quality medical treatment
- Improved interoperability among DoD health-related systems
- Medical situational awareness in any operational environment
- Enhanced healthcare delivery for medical personnel
- Increased productivity, cost benefit, and reduced time to deploy system improvements
- Enhanced analytics and reporting capabilities to deliver precision care
- Comprehensive management of care delivery and logistical support
- Effective medical field operations support
- Rapid deployment to emerging global situations requiring medical care support

CACI provides training and system support for forward deployed medical personnel from pre-deployment through the battlespace.

- **Medical Communications for Combat Casualty Care (MC4):** MC4 is the U.S. Army's single, tactical medical information management and IT system that delivers timely, cost-effective, and easy-to-use IT solutions to enable improved operational healthcare and patient documentation. CACI integrates, tests, trains, deploys, and sustains electronic medical record software onto the Army's systems. We automate and streamline installation and updates to speed release of new capabilities and improve functionality for users, and ultimately enhance interoperability of the systems and continuity of care for military personnel.
- **Defense Health Readiness Engineering Support (DHRES):** DHRES comprises tactical medical information management systems used by the U.S. Navy, U.S. Marine Corps, and U.S. Air Force. CACI provides training and system support for forward deployed medical personnel from pre-deployment through the battlespace. Our proven superior customer and system support helps healthcare providers deliver accurate, efficient medical treatment and enhances medical situational awareness in theater operational environments.
- **Defense Medical Logistics Standard Support (DMLSS):** The DMLSS program provides end-to-end medical logistics supply chain management to the DoD. CACI develops, tests, trains, and supports DMLSS, which provides a continuum of IT capability for logistics that overcomes the challenges of global operations from commercial suppliers to theater operations. CACI is currently performing a technical refresh of DMLSS, incorporating business intelligence, interfaces and data warehouse functions, and integrating assemblage management functions into the new centralized web service: LogiCole.
- **Expeditionary Contingency Medical Materiel (ECMM) Program:** CACI has unparalleled medical logistics expertise that includes building, maintaining, deploying, and reconstituting medical assemblages of all types required to support military operations. Through the ECMM program, we rapidly deploy assets in support of wartime, humanitarian relief, and other contingency response operations worldwide.

This material consists of CACI International Inc general capabilities information that does not contain controlled technical data as defined within the International Traffic in Arms (ITAR) Part 120.10 or Export Administration Regulations (EAR) Part 734.7-11. (3/2019)

**EXPERTISE AND TECHNOLOGY**
