

# Network Integration and Operations

## Any Platform, Any Device

CACI's network integration team reshapes the way our customers communicate, enabling them to meet immediate and future information demands. We provide direct mission support to Intelligence Community, Defense, and Civilian customers in the design, engineering, and integration of networks and mission software. Our network engineering expertise spans airborne, fixed, and mobile platforms and virtually any device. We deliver best-in-class cybersecure, multi-vendor solutions using patented and proprietary processes, tools, and techniques, as well as open-source solutions.

A *Fortune* World's Most Admired Company

EXPERTISE AND TECHNOLOGY FOR NATIONAL SECURITY

**CACI**  
EVER VIGILANT

## Network Integration

We use multi-vendor solutions to provide the best in unified communications, network design, integration, implementation, and installation, including market-leading contract and program management services.

### We deliver:

- Next-Generation high-speed networking for campus, bases, and buildings (CB&B)
- Maritime, deployable communications
- Cloud operations and data centers
- Global networks
- Wireless network integration solutions
- Network performance analytics

## Mission Software Development and Integration

We develop and integrate algorithms and applications on existing frameworks and platforms. Focusing on portability, compatibility, and software code reuse, we target specific customer needs using proven software design principles and open-source technologies.

### We have extensive experience in:

- Frameworks: REDHAWK, X-Midas, GNU Radio, Eclipse RCP, Ozone Widget Framework (OWF)
- Architectures: Server, SOA, cloud computing and web
- Platforms: Linux (RHEL, CentOS, Ubuntu), x86/x86\_64
- Languages: Python, C/C++, Java, Javascript, Grail

## Transforming the Network to a Cloud Enabler

We migrate systems from conventional rack-based servers to both commercial cloud services and custom virtual machine provisioning. As an Amazon Web Services consultant partner, we work closely with Amazon Cloud Services engineers and architects to build sophisticated applications for our customers that deliver increased flexibility, scalability, and reliability. Our AWS partnership also facilitates Cloud Services certifications for our engineers and IT personnel.

We offer our customers a patent-pending solution for cloud service management that provides significant savings in resources and cost when compared to conventional solutions.

We also implement custom virtual machine provisioning solutions using OpenStack.
