

Financial Management

Delivering End-to-End Transparency and Traceability

CACI delivers full lifecycle support, modernization, and transformation for core U.S. Government financial and planning, programming, budgeting, and execution (PPBE) systems. We leverage extensive financial management expertise and understanding of federal policies to produce clean audits and drive operational efficiencies in the systems we implement and sustain. We draw on more than 30 years of expertise in federal budget formulation practices to design solutions that scale and deliver adaptability and visibility across every level of government. Our solutions emphasize data transparency and traceability for improved compliance and well-informed decision making. We drive agility into our modernization efforts, leveraging model-based systems engineering and our industry-leading Agile Solution Factory (ASF) methodology. We are on the leading edge of technology by implementing advanced data visualization tools, predictive analytics, and robotic process automation (RPA) to amplify your workforce capabilities. We deliver integrated solutions at scale, accelerating data migration processes and interfaces that significantly reduce the time needed to stage, migrate, and validate data from months to weeks or days. We enable data accessibility and traceability across the financial enterprise. **We transform mission effectiveness through technology.**

- Integrated, advanced and predictive analytics visualized through operations dashboards
- Robotic process automation (RPA)
- Predictive analytics and artificial intelligence (AI) solutions
- Data visualization and operations dashboards
- Strategic partnerships with Salesforce, ServiceNow, SAP, Oracle®, OneStream, and other leading technology providers
- RMF Eagle risk management framework solution

Benefits

- Our deep domain expertise paired with the right technology delivers clean audits
- Innovation with RPA and advanced analytics generates operational efficiency

Modernization at Scale

Every dollar in the Department of Defense (DoD) budget is formulated, transacted, or reported through a CACI supported system

Over 10 years of clean audits for multiple customers across the DoD and the Intelligence Community (IC)

Leading the federal government's first SAP S/4 transition and modernization for the Department of the Interior

Integrated 26 DoD agencies into a core financial management system with 60,000 users

On the Leading Edge of Technology

CACI has extensive experience assisting the U.S. Government with transforming financial management and budgeting systems. We align the right set of technologies to meet customer needs for secure, reliable, and compliant systems, providing accessibility and visibility of data across the enterprise. We're experts in partnering with our customers to execute their cloud-enabled digital transformation initiatives. Our industry-leading ASF methodology is best in class for Agile development and DevSecOps at scale. We're leaders in advancing RPA to expedite routine business processes, delivering results in minutes versus hours or days. Our technologists apply advanced analytics and data visualization tools to strengthen the common operating picture and predictive forecasts of future trends. We harness the power of our technologies to maximize capabilities and improve the business value our customers realize from their financial management systems.
