Integrated Delivery at an Enterprise Scale

CACI is an industry leader in implementing, securing, sustaining, and modernizing enterprise resource planning (ERP) systems for the Department of Defense (DoD), Intelligence Community, and federal civilian customers. We drive modernization and transformation efforts for enterprise-level human capital, financial, and supply chain management systems to improve the effectiveness of existing systems and to rapidly enhance efficiencies and deliver new capabilities. We integrate data seamlessly across disparate systems to support a unified common operating picture through an ERP platform.

By partnering with our customers and leveraging our domain expertise, CACI minimizes custom code development and maximizes operational efficiency, improves data visibility and governance, and decreases operational costs. We bring leading-edge technologies to modernize end-user access to data. Our artificial intelligence and advanced analytics solutions maximize the impact of an enterprise view of data on our customers’ operations and decisions. Our industry-leading Agile Solution Factory (ASF) powers our Agile development and DevSecOps at scale. CACI injects transparency into every aspect of our solution delivery, elevating the visibility of data and performance through operations dashboards, increasing the velocity at which well-informed decisions can be made. We enhance enterprise operations through ERP modernization.
