Network Operations and Sustainment

Advancing Network Performance

CACI maintains and transforms large networks for critical missions around the world. We provide the expertise and technology to keep our customers' networks operational and secure across multi-domain security environments. We utilize forward-leaning technologies and apply continuous innovation to transform network infrastructure with the latest tools and automation. We recommend, test, integrate, and deploy new technologies to advance the capabilities of existing networks, including secure wireless technologies, software-defined networking, and 5G. We amplify network security, implementing artificial intelligence (AI) and robotic process automation (RPA) solutions in addition to cyber monitoring and cyber hunting activities. We understand the importance of seamless network operations and continuity for our customers' missions. **We improve network performance for critical enterprise missions.**

CACI
EVER VIGILANT

Features

- Network infrastructure and modernization
  - Network architecture, design, integration, installation, and certification
- Operations and sustainment
  - Global network operations, monitoring, and provisioning
- Cybersecurity
- Full telecommunications system lifecycle support
- Sensor and surveillance network design, deployment, and operation
- Network operation security centers (NOSCs)
- Wireless networking expertise with microwave, 5G, mesh, wireless local area network (LAN), and tactical edge networks
- Optical transport networks
- Voice networks
- Software-defined networks
- Multi-level secure networks
- AI and RPA
- Agile development and DevSecOps powered by our industry-leading Agile Solution Factory
- Unclassified to classified software development
- Flexible delivery models, such as network as a service, catalog service, and customer-owned models

Benefits

- Highly reliable and available communications that are secured from rapidly evolving cyber threats
- Worldwide network installation and operations
- ISO-certified project management processes

Operations and Sustainment for Enterprise Networks

Engineering, operations, and sustainment for four major networks moving more than one petabyte of data a day for an Intelligence Community (IC) customer

Providing network services for 25,000 work stations, 30,000 users, and 330 mobile devices for a U.S. Air Force customer

Delivering secure unclassified to classified-side development of network tools for an IC customer

Operating NOSCs for large scale Department of Defense (DoD) and IC customer enterprise networks

CACI

EVER VIGILANT

EXPERTISE AND **TECHNOLOGY**
FOR NATIONAL SECURITY

CACI's approximately 23,000 talented employees are vigilant in providing the unique expertise and distinctive technology that address our customers' greatest enterprise and mission challenges. Our culture of good character, innovation, and excellence drives our success and earns us recognition as a *Fortune* World's Most Admired Company. As a member of the *Fortune* 1000 Largest Companies, the Russell 1000 Index, and the S&P MidCap 400 Index, we consistently deliver strong shareholder value. Visit us at www.caci.com.
