

Network Infrastructure

State-of-the-Art Network Design and Implementation

CACI delivers industry-leading expertise and technology for network infrastructure design, implementation, and optimization of networks for communications and IT sensor integration. Our networks enable quick, reliable, and secure transmission of mission-critical data, including communications and IT sensor information on the same network. We enable secure state-of-the-art worldwide communications out to the tactical edge.

We have global experience with outside plant infrastructure (OSP) and more than 30 years of success with inside plant infrastructure (ISP) design and upgrades, all while adhering to a variety of systems and requirements. Our wired and wireless solutions provide agile, flexible, and user-centric network technologies to stay ahead of the growing demand for data with the speed, security, and reliability customers need for continuity of operations and mission success. Our experience, expertise, and technology enable us to closely collaborate with customers on affordability and infrastructure with an eye on the mission, without sacrificing continuity or quality. Our solutions are secure by design, with security integrated into the network's plans and construction. **We deliver agility, efficiency, speed and performance for enterprise missions.**

A *Fortune* World's Most Admired Company

EXPERTISE AND TECHNOLOGY FOR NATIONAL SECURITY

CACI
EVER VIGILANT

Features

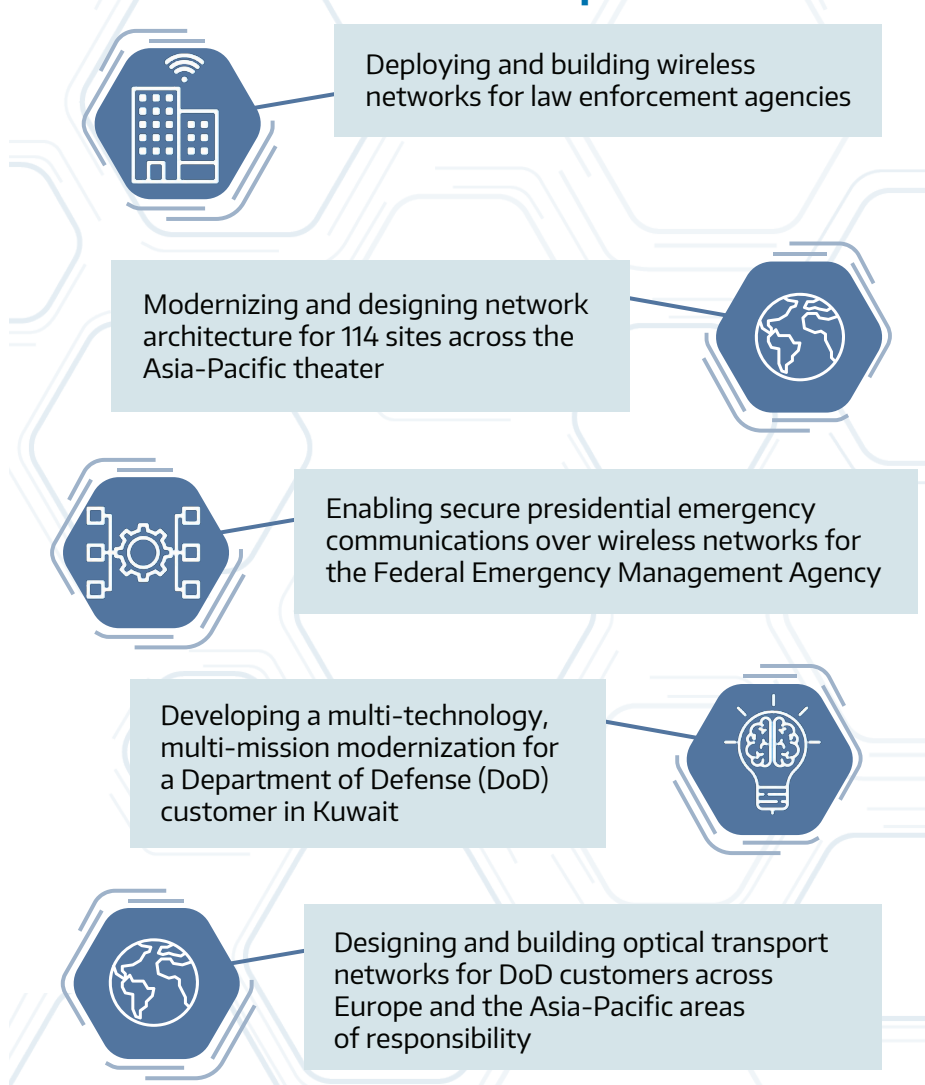

- Network modernization
- Network architecture, design, integration, installation, and certification
- Worldwide experience with OSP and ISP
- Data network design and implementation, including ethernet and internet protocol (IP) switching and routing, multi-domain, multi-level security, and zero trust architecture solutions
- Voice networks
- Optical transport networks
- Wireless networking solutions, including microwave, 5G, mesh, wireless local area network (LAN), and tactical edge networks
- Emergency management systems modernization and sustainment
- Vendor and technology agnostic
- Flexible delivery models, such as network as a service, catalog service, and customer-owned models

Benefits

- Integrated turnkey network solutions
- Highly reliable and readily available communications, secured from rapidly evolving cyber threats
- Network continuity during migration, upgrade, or installation
- ISO-certified project management processes

Infrastructure for the Enterprise

Secured, High-Performing Networks

CACI creates solutions that improve the performance, efficiency, and security of IT infrastructure. Cyber defense starts with infrastructure design and integration. We have extensive experience implementing secured infrastructure, from monitoring and detecting fiber, to securing and alerting infrastructure vulnerabilities and intrusions. We have demonstrated expertise in the latest IT technologies — software-defined networks, zero trust solutions, high-speed transport protocols, and artificial intelligence. Our mission-first mindset drives solutions for our customers' success.

We deliver modern infrastructure for modern communications.

**EXPERTISE AND TECHNOLOGY
FOR NATIONAL SECURITY**

CACI's approximately 23,000 talented employees are vigilant in providing the unique expertise and distinctive technology that address our customers' greatest enterprise and mission challenges. Our culture of good character, innovation, and excellence drives our success and earns us recognition as a *Fortune* World's Most Admired Company. As a member of the *Fortune* 1000 Largest Companies, the Russell 1000 Index, and the S&P MidCap 400 Index, we consistently deliver strong shareholder value. Visit us at www.caci.com.
