OneScope

Integrating Transparency into Delivery

CACI's OneScope Portal is a secure, configurable, cloud-based solution that provides centralized access to program management-level information accessible by both government customers and contractor staff, which enhances transparency, drives efficiencies, and provides coordinated service delivery capabilities. OneScope provides a "single-pane-of-glass" view into how a project is performing through the use of various small applications called "modules." These modules are designed to automate a specific business process using a wizard-based data capture process, automated workflows, shared document libraries, templates, and dashboards used to visually depict statistics associated with each particular business area (see the Capabilities section for a listing of modules).

Gone are the days of siloed emails or delays when needing to check status or generate reports. CACI business systems experts created OneScope to integrate enterprise data and processes to provide situational awareness, visibility, and knowledge-sharing across portfolios. It leverages the Cloud-native Microsoft O365 Platform, SharePoint Online, PowerApps, Power Automate, and Power BI and is hosted with the secure GCC-High (NIST 800-171 compliant) environment. OneScope supports Common Access Card (CAC) and Personal Identity Verification (PIV) access to the Portal, and leverages Cybersecurity best practices.

A *Fortune* World's Most Admired Company

EXPERTISE AND TECHNOLOGY FOR NATIONAL SECURITY

CACI
EVER VIGILANT

Features

- Modular design enables using one or multiple applications that comprise the portal platform depending on needs and existing technology landscape

- Configurable software as a service (SaaS) offering that can be tailored, configured, or extended to address specific needs

- Continuous innovation: benefits from evolving O365/PowerApps features, and CACI's consistent release of new features monthly

- Secure platform hosted in GCC-High, compliant with 800-171 security controls

- Integrated survey tool for rating innovation concepts submitted via the Innovation Engine

- Document library serves as a repository for all artifacts relevant to a project

Benefits

- Improved transparency that provides users with 24x7 self-service access to module features and item statuses

- Enhanced efficiencies for automating business processes that were completed by emailing attachments

- Informed and enhanced decision-making

- Exceeds FEDSIM portal requirements

- Cloud based, highly configurable, and scalable

- Consolidated management portal provides a one-stop shop for authoritative program information accessible to government and contractor staff

OneScope: Knowledge-sharing portal offers greater transparency and efficiency to programs and projects.

- OneScope supports tailored workflows, audit ready asset management and procurement processes, and marketplace functionality that significantly streamlines IT refresh processes while providing full government visibility.

- OneScope provides full government visibility into enterprise service desk operational status and trends.

- OneScope delivers total transparency, process workflow automation, process controls, and collaboration across the end-to-end task lifecycle.

Available Reports and Metrics in OneScope:

- Delivery velocity
- Cost per story point
- Story point per release
- Escaped defects
- Committed versus delivered
- Content spread
- Software release quality

Capabilities:

- Staffing automation
- Program management
- Deliverable management
- Travel authorization
- CAC/PIV tracking
- Candidate submission
- Expense variance
- Innovation Engine
- Offboarding
- Onboarding
- Project tracking
- Quality assurance
- Risk management
- Skills/certification tracking
- Small business utilization
- Travel authorization
- Trip report
- Travel tracker
- Staff roster

Most modules include automatic notifications, status updates, reporting and/or dashboards.
