

Network Operations and Sustainment

Advancing Network Performance

CACI maintains and transforms large enterprise networks for critical missions around the world. We provide the expertise and technology to keep our customers' networks operational and secure across multi-domain security environments. By utilizing forward-leaning technologies and applying continuous innovation, we transform network infrastructure with the latest tools and automation.

We recommend, test, integrate, and deploy new technologies to advance the capabilities of existing networks, including secure wireless technologies, software-defined networking, and 5G. We amplify network security, implementing artificial intelligence (AI) capabilities in addition to cyber monitoring and cyber hunting activities. Our experts understand the importance of seamless network operations and continuity for our customers' missions. **CACI improves network performance for critical enterprise missions.**
