Enterprise Cyber Defense

Prepare, Defend, and Sustain the Enterprise

An expanding digital landscape is driving cyber threats to enterprise IT systems and the mission. Cyber defense for enterprise IT demands a structured, strategic process that can adapt to evolving vulnerabilities and emerging technologies. CACI is at the forefront of enabling information protection superiority through full-spectrum expertise, technology, and partnerships with leading cyber defense providers to protect, identify, and respond to vulnerabilities and incidents. We assist customers with cyber strategies, including governance and architecture, monitoring, threat identification, risk mitigation, and proactive cyber hunt and response activities.

Our proven cybersecurity lifecycle approach ensures the confidentiality, integrity, and availability of networks, systems, and data. We deliver advanced technology, and secure systems, applications, and infrastructure to safeguard critical data across all endpoints for any mission. Our experts leverage our Internet Research Lab to provide scalable infrastructure for anonymous open source gathering, probing, aggregation, analysis, and visualization. Our DeviceX products aid automated mobile app analysis and system and network vulnerability analysis. Our unique artificial intelligence/machine learning (AI/ML)-enabled cyber sensor solutions speed threat identification and remove vulnerabilities. Our proven Agile Solution Factory employs DevSecOps principles to provide secure, effective, predictable, and affordable development and sustainment of custom software and hardware products. CACI's comprehensive, integrated analytics and operations dashboard provides traceability and transparency of cyber status across multiple systems and applications. **We protect our customer's future by securing it today.**

A *Fortune* World's Most Admired Company

EXPERTISE AND TECHNOLOGY FOR NATIONAL SECURITY

CACI
EVER VIGILANT

Features

- Secure cloud computing and network architecture
- Integrated, multi-disciplinary zero-trust governance models
- Continuous diagnostics and mitigation
- Accelerated authority to operate (ATO) lifecycle processes
- Lifecycle vulnerability analysis and remediation
- Hybrid and multi-cloud security engineering
- Cross-domain and multi-domain security
- Mobile and endpoint protection
- Digital forensics and eDiscovery
- Security intelligence and analytics
- Security operations center services

Benefits

- Optimized mission-critical components that help cyber decision makers respond confidently
- Strong multi-layer cyber defense emphasis results in less time and fewer resources spent on network defense
- A single dashboard depicting complete cybersecurity situational awareness
- Network reconnaissance and mapping solutions enable insight into large volumes of data needed for in-depth network analysis
- We continually strengthen the customers' entire ecosystem for protection from cyberattacks

Enabling the Enterprise and Mission Securely and Reliably
Cyber Expertise

Our experts protect and safeguard critical data, and identify and mitigate threats. We work with customers to architect and modernize security policies and governance, using advanced analytics for elevated visibility into security postures and risk mitigation – from decision makers to first responders. We use the latest advances in security and research and development (R&D) to build new cyber defenses for systems, cloud and network infrastructure, applications, and internet of things (IoT) sensors.

Cyber Technology

CACI engineers security solutions that proactively identify and remediate threats and vulnerabilities to mission-essential data, systems, and infrastructure. Our hybrid cloud security capabilities enable secure, reliable access to data across our customers' enterprise and out to the mission's tactical edge. Our multi-domain security solutions deliver advanced capabilities to support classified operations.
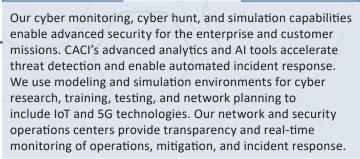

Cyber Tradecraft

Our cyber monitoring, cyber hunt, and simulation capabilities enable advanced security for the enterprise and customer missions. CACI's advanced analytics and AI tools accelerate threat detection and enable automated incident response. We use modeling and simulation environments for cyber research, training, testing, and network planning to include IoT and 5G technologies. Our network and security operations centers provide transparency and real-time monitoring of operations, mitigation, and incident response.

CACI Leads the Way in Cybersecurity

CACI is an industry leader in cybersecurity, supporting the Intelligence Community and the entire Department of Defense with more than 1,800 cyber and information assurance professionals at all levels. For more than 20 years, we have performed targeted, country-wide, and global path network analyses for U.S. Government agencies, including providing cybersecurity tools, monitoring, and incident response automation for the Department of Homeland Security.

CACI
EVER VIGILANT

EXPERTISE AND **TECHNOLOGY**
FOR NATIONAL SECURITY

CACI's approximately 22,000 talented employees are vigilant in providing the unique expertise and distinctive technology that address our customers' greatest enterprise and mission challenges. Our culture of good character, innovation, and excellence drives our success and earns us recognition as a *Fortune* World's Most Admired Company. As a member of the *Fortune* 1000 Largest Companies, the Russell 1000 Index, and the S&P MidCap 400 Index, we consistently deliver strong shareholder value. Visit us at www.caci.com.
