

The Next Generation of ERP: Integrated Delivery at an Enterprise Scale

CACI is an industry leader in implementing, securing, sustaining, and modernizing enterprise resource planning (ERP) systems for the Department of Defense (DoD), Intelligence Community, and federal civilian customers. We drive modernization and transformation efforts for enterprise-level human capital, financial, and supply chain management systems to improve the effectiveness of existing systems and to rapidly enhance efficiencies and deliver new capabilities. We integrate data seamlessly across disparate systems to support a unified common operating picture through an ERP platform.

By partnering with our customers and leveraging our domain and leading-edge technical expertise – including Oracle, SAP, and Momentum – CACI delivers the Next Generation of ERP and maximizes operational efficiency, improves data visibility and governance, and decreases operational costs. Our solution enables the ERP ecosystem with nimble, composable architectures and platforms that are efficiently structured, freeing customers from vendor lock-in; enabling the use of best-of-breed applications; and creating simple, seamless workflows that optimize and modernize the end-user experience and improve business processes. CACI's artificial intelligence and advanced analytics solutions maximize the impact of an enterprise view of data on our customers' operations and decisions. Our industry-leading Agile Solution Factory (ASF) powers our Agile development and DevSecOps at scale. CACI injects transparency into every aspect of our solution delivery, elevating the visibility of data and performance through operations dashboards, increasing the velocity at which well-informed decisions can be made. **We enhance government operations and transform the enterprise through industry-leading, agile NextGen ERP solution delivery.**

Features

- Application modernization
- Digital transformation
- UX Factory
- Business Process Reengineering
- Industry-leading Agile Solution Factory (ASF)
- DevSecOps at scale
- Model-based systems engineering (MBSE) and digital engineering
- Cloud migration at scale to Amazon Web Services, Microsoft Azure, or hybrid cloud environment
- Integrated, advanced, and predictive analytics visualized through operations dashboards
- Low-Code / No-Code development
- Robotic Process Automation (RPA)
- Artificial intelligence (AI) solutions
- Deep domain expertise and strategic partnerships with Salesforce, ServiceNow, SAP, and other leading technology providers
- RMF Eagle risk management framework solution

Benefits

- Integrates and modernizes disparate systems into a comprehensive Next Gen ERP system, providing an enterprise view and improving operations and driving efficiency
- Enables the user community for success with a user experience that is easy to use, easy to support, and easy to deliver continual improvement – all with little to no formal training required
- Improves data accuracy at point of entry to optimize data quality for improved analytics
- Delivers architecture that is flexible enough to accommodate changing business and mission requirements, while isolating business processes and trading partners from organizational change risks
- Provides a bridge between systems that minimizes migration impact, enables new capabilities, and improves data quality

Extensive Cross Platform Next-Gen ERP Experience

- Modernization and operations and maintenance of Department of Defense Uniformed Service logistics system, processing 2.25 million daily transactions
- Developing a Next Generation ERP solution for a Defense Health Agency (DHA) that simplifies business processes and provides a single user experience to transact and report against multiple medical logistics and asset visibility systems
- Migrated a Customs and Border Protection (CBP) production landscape including ERP platforms, 60 databases, 71 applications, over 160 interfaces, and 60TB of data from an on-prem environment to the cloud
- Implemented the U.S. Army's single personnel and pay system for more than 1 million users
- Provides Agile systems integration and sustainment for the Air Force's General Fund accounting and financial management system that is utilized by over 17,000 users
- Leading the first department level SAP ECC to S/4HANA migration for the US Federal Government consisting of 10 bureaus, 60 plus conversion objects, 74 million records and 14000 users.
