

Expertise and technology for national security

CACI is ever vigilant in helping our customers meet their greatest challenges in national security.

CACI's differentiated expertise and technology address our customers' greatest challenges. We are proud of our outstanding record of service, but it is our ongoing innovation and drive for excellence that strengthen our relationships with defense, intelligence, and civilian customers and lead to our success.

CACI is at the forefront of developing and delivering technological breakthroughs that transform and optimize government operations. We invest ahead of need and rapidly prototype signals intelligence, electronic warfare, full-spectrum cyber, and photonics technologies to counter emerging threats and enable multi-domain operations. We are advancing the protection of vital communications and IT infrastructure, and our innovations in deep learning are solving complex problems at scale. Our data fusion and visualization technologies aid customers in decision-making, while our business process automation tools shorten timelines and enhance productivity.

KEY FACTS

- Revenue: \$7.7B
- Number of employees: 25,000
- A Fortune 500 company
- 2025 Top Places to Work USA
- Leading employer of veterans

CACI is on the cutting edge of innovation, investing ahead of need to support our customers' mission outcomes.

Command, Control, Communications, and Intelligence

CACI enables decision superiority across every domain. Our multi-domain command and control, communications, and intelligence solutions provide commanders with the data they need to quickly adapt, outpace, and outmaneuver in operations around the globe, while simultaneously defeating adversarial systems.

Cyber

CACI develops and delivers premiere cyber technology, solutions, and expertise that empower our customers to conduct offensive and defensive operations, defend critical infrastructure, and maintain information dominance, safeguarding U.S. national security against evolving threats.

Digital Solutions

CACI digitally transforms organizations using Agile methodologies and advanced analytics. The result is modernized applications, infrastructure, and business processes that enhance performance and translate data into decisions for our customers.

Enterprise IT

CACI modernizes end-to-end IT infrastructure to securely deliver data, optimize efficiencies, enhance performance, and improve end-user satisfaction – from on-premise to the cloud and the edge.

Mission and Engineering Support

A unique combination of unparalleled expertise and exquisite skills make CACI a steadfast and trusted partner to intelligence and defense agencies and their missions – 24/7/365. Our leading-edge solutions help analysts and operators around the world deliver uncompromising national security.

Space

In the highly contested and increasingly complex space domain, CACI performs mission operations and data management to ensure space system optimization and resilience. We protect our nation's assets and interests by transmitting and deciphering vital information to and from the final frontier.

Spectrum Superiority

From sea to space, CACI's software-defined technologies help customers sense, make sense, and take decisive actions across the spectrum. Customers stay one step ahead, targeting advanced, evolving threats with precision effects and redefining what dominance means in the battlespace.
