TO LEARN MORE ABOUT NASPO

CACI's Acquisition Support Group (ASG) provides industry-leading talent and cutting-edge solutions to support acquisition, contracting, and procurement activities. Our hands-on subject matter experts (SMEs) seamlessly integrate with customer teams to support activities across purchasing lifecycles for supplies, professional services, and construction, while our innovative technology solutions optimize data-heavy processes. Our proprietary cloud-based application, FedSelect, is designed to centralize, streamline, and standardize source selection evaluation to save customers time and money.

Strategic partner for states

CACI ASG has been selected by the National Association of State Procurement Officials (NASPO) for a Procurement Acquisition Support Services (PASS) award. As a NASPO PASS-vetted contractor, we are excited to deliver the following services to state and local governments:

Procurement acquisition support services

- Procurement strategy/strategy plan
- Independent government cost estimate
- Specifications/scope of work review
- Market research
- Cost and price analysis
- Solicitation review or preparation
- Source selection
- Cost realism analysis
- Contract development/formation
- Contract management
- Vendor performance evaluation program

Value add services

- Procurement policy and digital procurement transformation
- Change management and procurement transformation assistance
- Category management
- Procurement training
- Project management
- Grants assistance and management

CACI

Case study: District Department of Transportation (DDOT)

CHALLENGE

DDOT OCP needed to streamline processes while enhancing transparency and responsiveness throughout the procurement lifecycle in support of managing and maintaining the District's critical transportation infrastructure while adhering to complex Federal and local regulations.

OUR APPROACH

CACI leverages our nationwide pool of highly qualified procurement talent to fill mission-critical roles and requirements—embedding our team with DDOT OCP's for seamless service, project execution, and knowledge management. Our extensive recruiting network and management flexibility enable quick responses to DDOT OCP's emerging requirements in support of supplies, architecture and engineering (A&E) professional services, and construction procurements. We pair comprehensive expertise with innovative data analysis solutions to increase the efficiency and transparency of key processes.

RESULTS

The enduring, nearly decade-long partnership between CACI and DDOT OCP stands as a testament to the effectiveness of our dedicated expertise and innovative solutions.

- **Scalability:** Our recruitment breadth and corporate infrastructure stability enable DDOT OCP to scale to meet changing demands cost-effectively, while reducing continuity of operations risks. Since 2016, the CACI team within DDOT OCP has grown from one to 12 full-time personnel in various roles to meet evolving needs across acquisition planning, market research, solicitation development, and contract administration.
- **Cost Savings:** The addition of three Cost and Accounting SMEs—by customer request based on the exceptional work of one part-time SME—produced an estimated cost savings of \$22M through our review and auditing procedures.
- **Optimization:** DDOT OCP has conducted over 300 technical source selection evaluation panels efficiently using our FedSelect tool. Additional custom tools, such as the Determinations and Findings (D&F) for Responsibility Generator and AI-powered document reformatting tool, have reduced processing times from hours to minutes and minimized errors in acquisition workflows.

CUSTOMER QUOTE

“Automation of the source selection process through the FedSelect tool has been invaluable.” – Supervisory Contract Specialist, DDOT, OCP
